Factors Leading to Marriage outside the Circle of the Bedouin Clan in the Palestinian Society

Abstract : The study aimed at identifying the percentage importance of the factors leading to the marriage outside the clan (Asheera) among sons of Palestinian Bedouin community And identifying the intrinsic or significant differences in the Factors leading to marriage from outside the clan (Asheera) among sons of Palestinian Bedouin community according to the following variables: age, Educational level, and income level.
The study sample included () individuals who are married form outside

the clan (Asheera) in Palestinian Bedouin community at Khanjounis Governorate. A scale of factors leading to marriage form outside the clan among sons of Palestinian Bedouin community prepared by the researcher was used. For study data treatment frequencies, percentages, T-Test, one-way-Anova and Tockey test were used.

The Study revealed that the religious factor got the first rank for the factors leading to marriage from outside the clan with a percentage Balance of 35.7%, followed by: health factor with a percentage balance of 28.6%, social factor with a percentage balance of 14.3%, psychological factor with a percentage balance of 14.3%, and the economical factor with a percentage balance of 7.1%.

The study also revealed that there were no intrinsic differences between marks means of factor leading to marriage form outside the clan due to the variables of: age, educational level, vocational level, and income level. While there were no moral differences in the health factor due to the variable of income level in favor of low and average income levels.
