(134)

. 2003- 2002

Abstract:The study aimed at identify the occurring practical training education of Al Quds Open University regions in all Gaza governorates.

In order to achieve this aim, the researcher drew up a questionnaire which was distributed on a sample of 134 students (males and females) who are registered in the practical training education course in the first term of the study academic year 2003-2004.

In order to achieve the statistical purpose, the researcher used the arithmetic mean, standard deviation and proportional weight. The results showed that the academic supervisor axis occupied the first rank in the examined person's answers, while the training school axis occupied the seventh rank.

The researcher recommended a suggested perspective to develop practical training education program in Al Quds Open University.
